

# Drive Measurable Success With Hospice Technology

Complete solutions that help power your business.

## AT A GLANCE

### Balancing Quality Care and Quality Results:

- Providers face growing demands to balance patient care with documentation requirements.
- Your ability to meet expectations in both areas significantly impacts your business's success.
- Driving improvement in 3 key areas can provide meaningful results for your business & the lives you touch - and technology can help.

## Key Success Metrics

According to Hospice News, technology can help provide measurable improvements in these critical factors:

**Clinical Workflow Efficiency**

**Patient and Family Satisfaction**

**Financial and Operational Outcomes**

## OUR SOLUTIONS

A.I.D.E. and Document Defender seamlessly integrate with your EMS/EHR system to transform the clinical documentation process, driving successful KPI's. While A.I.D.E. automates the generation of the clinical notes, Document Defender proactively reviews the generated content against regulatory standards and forecasts the financial impact of potential errors before they occur.

## BENEFITS

### Workflow Efficiency

1

The intuitive reports and data generated by our tools provide real-time insights, allowing training opportunities that refine skills and enhance documentation practices, while fostering continuous learning and growth within your organization.

### Patient Satisfaction

2

By spending less time on administrative tasks, clinicians can spend more time on patient visits per day. This leads to more consistent care, quicker response times, and ultimately enhances the overall patient experience.

### Financial and Operational Outcomes

3

By identifying clinical notes that are outside of compliant parameters, providers are able to significantly reduce the chances of costly fines. With fewer discrepancies, claims are less likely to be delayed or rejected, improving cash flow and financial stability.

## Notable Results

2

**More Patient Visits Per Day\***

10

**More Hours Per Week\***

60

**% Reduced Liability Risk**

\*Highlighted KPIs are measured per clinician. The compliance of Empower's tools is solely dependent on your use, implementation, and operational practice.
