

The word "EMPOWER" is written in a bold, teal, sans-serif font. The background of the top section features a collage of medical and financial imagery, including a stethoscope, a clock face, and various US dollar bills.

Could You Be Leaving Money on the Table?

Accelerate your cash flow: Let Empower streamline your billing & collections to help you get paid accurately, on time.

Slow or Incomplete Prior Authorizations

Issues with prior authorizations can lead to delayed treatments, service failure, and lost revenue. If staff aren't proactively managing authorizations or following up on pending requests, providers risk delayed reimbursements or even write-offs for unpaid claims.

High Claim Denial Rates

Denied claims don't just delay payments—they often lead to lost revenue. Many denials are due to avoidable errors like incorrect patient information, missing documentation, or outdated coding. Without a strong denial management strategy, providers leave thousands of dollars uncollected.

Inefficient Collections

Many providers struggle to collect payments, often due to unclear/inefficient billing and collection processes, or a general lack of bandwidth. If collections aren't improved, providers risk a growing backlog of work with little actual revenue gain.

Missed Reimbursements

Inaccurate billing happens when services aren't fully documented or coded correctly, leading to lower reimbursements. A lack of regular billing audits can leave money you're entitled to on the table, without anyone noticing.

Our solutions help address these challenges so you can maximize your cash flow and focus on what matters most.
